JOURNAL OF GUIDANCE, CONTROL, AND DYNAMICS
Volume 23, No. 6, November–December 2000

2000 *Journal of Guidance, Control, and Dynamics* Index

How to Use the Index

In the Subject Index, pages 1140–1144, each technical paper is listed under a maximum of three appropriate headings. Note the locating number in boldface type preceding each paper title, and use that number to find the paper in the Chronological Index. The Author Index, page 1145-1146, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index. The Chronological Index, pages 1147-1151, also lists all papers by their locating numbers. This listing contains titles, authors and their affiliations, and volume, issue number, and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based, as well as the ISBN number if the paper was published in a bound collection of meetings papers. Comments, Replies, and Errata are listed directly beneath the paper to which they refer. If the paper to which they refer was published prior to 2000, that paper also will appear in both the Subject and Chronological Indexes. Authors of Comments also are listed in the Author Index. The Book Review Index, page 1152, lists the books reviewed during 2000, the author, publisher, and reviewer, and the volume, issue number, and page on which the review appeared.

Subject Index

Aircraft Technology, Conventional, STOL/VTOL

Aerodynamics

G00-139 Benchmark Active Controls Technology Model Aerodynamic Data
G00-140 Computational Test Cases for the Benchmark Active Controls Model

Aeroelasticity and Aeroservoelasticity

G00-163 Comparison of Two Navier-Stokes Methods with Benchmark Active Control Technology Experiments
G00-164 Active Control of Wind-Tunnel Model Aeroelastic Response Using Neural Networks
G00-165 Adaptive Output Feedback Control of a Nonlinear Aeroelastic Structure
G00-140 Computational Test Cases for the Benchmark Active Controls Model
G00-168 Control of a Nonlinear Aeroelastic System Using Euler-Lagrange Theory
G00-144 Experiments on Control of Limit-Cycle Oscillations in a Typical Section
G00-166 Fundamental Aeroservoelastic Study Combining Unsteady Computational Fluid Mechanics with Adaptive Control
G00-167 Identification and Control of Limit Cycle Oscillations in Aeroelastic Systems
G00-141 Transonic Flutter Suppression Control Law Design and Wind-Tunnel Test Results

Aerospace Plane

G00-111 Long-Range Performance of Suboptimal Periodic Hypersonic Cruise Trajectories

Communication and Air Traffic Control

G00-074 Fast-Time Study of Airline-Influenced Arrival Sequencing and Scheduling
G00-122 Shared Information Between Pilots and Controllers in Tactical Air Traffic Control

Flight Control Integration

G00-037 Design and Piloted Simulation of a Robust Integrated Flight and Propulsion Controller

Flight Mechanics

G99-055 Comment on "Does the Phugoid Frequency Depend on Speed?"
G00-005 Dual Payload Ascent Trajectory Optimization with a Splash-Down Constraint
G00-135 Improved Dispersion of a Fin-Stabilized Projectile Using a Passive Moveable Nose
G00-117 Linear Theory of a Dual-Spin Projectile in Atmospheric Flight
G00-111 Long-Range Performance of Suboptimal Periodic Hypersonic Cruise Trajectories

Flight Operations

G00-074 Fast-Time Study of Airline-Influenced Arrival Sequencing and Scheduling

Noise

G00-147 Online Estimation of Allan Variance Parameters

Rotorcraft

G00-154 Quantitative Cross-Feed and Feedback Design of Helicopter in near Hover Flight

Simulation

G00-074 Fast-Time Study of Airline-Influenced Arrival Sequencing and Scheduling
G00-063 Simulator Platform Motion Effects on Pilot-Induced Oscillation Prediction
G00-133 Worst-Case Distributions for Performance Evaluation of Proportionally Guided Missiles

STOL/VTOL/STOVL

G00-037 Design and Piloted Simulation of a Robust Integrated Flight and Propulsion Controller

Testing, Flight and Ground

G00-147 Online Estimation of Allan Variance Parameters
G00-120 Real-Time Parameter Estimation in the Frequency Domain

Vibration

G00-145 Identification and Retuning of Optimum Delayed Feedback Vibration Absorber

Fluid Dynamics

Computational Fluid Dynamics

G00-166 Fundamental Aeroservoelastic Study Combining Unsteady Computational Fluid Mechanics with Adaptive Control
G00-163 Comparison of Two Navier-Stokes Methods with Benchmark Active Control Technology Experiments

Transonic Flow

G00-163 Comparison of Two Navier-Stokes Methods with Benchmark Active Control Technology Experiments
G00-140 Computational Test Cases for the Benchmark Active Controls Model

Unsteady Flows

G00-166 Fundamental Aeroservoelastic Study Combining Unsteady Computational Fluid Mechanics with Adaptive Control
G00-163 Comparison of Two Navier-Stokes Methods with Benchmark Active Control Technology Experiments
G00-167 Identification and Control of Limit Cycle Oscillations in Aeroelastic Systems

Guidance, Control, and Dynamics Technology

Aircraft Dynamics

G00-166 Fundamental Aeroservoelastic Study Combining Unsteady Computational Fluid Mechanics with Adaptive Control

Testing, Flight and Ground

G00-147 Online Estimation of Allan Variance Parameters
G00-120 Real-Time Parameter Estimation in the Frequency Domain

Vibration

G00-145 Identification and Retuning of Optimum Delayed Feedback Vibration Absorber

Fluid Dynamics

Computational Fluid Dynamics

G00-166 Fundamental Aeroservoelastic Study Combining Unsteady Computational Fluid Mechanics with Adaptive Control
G00-163 Comparison of Two Navier-Stokes Methods with Benchmark Active Control Technology Experiments

Transonic Flow

G00-163 Comparison of Two Navier-Stokes Methods with Benchmark Active Control Technology Experiments
G00-140 Computational Test Cases for the Benchmark Active Controls Model

Unsteady Flows

G00-166 Fundamental Aeroservoelastic Study Combining Unsteady Computational Fluid Mechanics with Adaptive Control
G00-163 Comparison of Two Navier-Stokes Methods with Benchmark Active Control Technology Experiments
G00-167 Identification and Control of Limit Cycle Oscillations in Aeroelastic Systems

Guidance, Control, and Dynamics Technology

Aircraft Dynamics

G00-166 Fundamental Aeroservoelastic Study Combining Unsteady Computational Fluid Mechanics with Adaptive Control

G00-084 Application of a Dichotomic Basis Method to Performance Optimization of Supersonic Aircraft
G00-167 Identification and Control of Limit Cycle Oscillations in Aeroelastic Systems
G00-117 Linear Theory of a Dual-Spin Projectile in Atmospheric Flight
G00-041 Nonlinear Six-Degree-of-Freedom Aircraft Trim
G00-061 Perspective Predictor/Flight-Path Display with Minimum Pilot Compensation

Aircraft Guidance

G00-151 A Novel Method for Identification of Aircraft Trajectories in Three-Dimensional Space
G00-053 Flight Control Design of an Automatic Landing Flight Experiment Vehicle
G00-055 Nonlinear Entry Trajectory Control Using Drag-to-Altitude Transformation
G00-052 Output Tracking for Actuator Deficient/Redundant Systems: Multiple Piezoactuator Example
G00-061 Perspective Predictor/Flight-Path Display with Minimum Pilot Compensation

Aircraft Stability and Control

G00-060 Accommodating a Class of Actuator Failures in Flight Control Systems
G00-164 Active Control of Wind-Tunnel Model Aeroelastic Response Using Neural Networks
G00-040 Automatic Landing System Design Using Fuzzy Logic
G00-168 Control of a Nonlinear Aeroelastic System Using Euler-Lagrange Theory
G00-153 Decentralized Design for Integrated Flight/Propulsion Control of Aircraft
G00-092 Design of Lifted Dual-Rate Digital Controllers for X-38 Vehicle
G00-065 Gain-Scheduled Lateral Control of the F-14 Aircraft During Powered Approach Landing
G00-128 Intelligent Adaptive Control of a Tailless Advanced Fighter Aircraft Under Wing Damage
G00-073 Loop Shaping Design for Missile Autopilots: Controller Configurations and Weighting Filter Selection
G00-042 New Flight Simulator Experiments on Pilot-Involved Oscillations due to Rate Saturation
G00-038 Nonlinear H∞ Flight Control of General Six-Degree-of-Freedom Motions
G00-007 Nonlinear H∞ Method for Control of Wing Rock Motions
G00-041 Nonlinear Six-Degree-of-Freedom Aircraft Trim
G00-147 Online Estimation of Allan Variance Parameters
G00-142 Passivity-Based Robust Control with Application to Benchmark Active Controls Technology Wing
G00-064 Probabilistic Approach to Aircraft Performance Enhancement in Atmospheric Turbulence
G00-154 Quantitative Cross-Feed and Feedback Design of Helicopter in near Hover Flight
G00-120 Real-Time Parameter Estimation in the Frequency Domain
G00-043 Ride Quality of Civil Aircraft from a Probabilistic Viewpoint
G00-012 Robust Longitudinal Flight Control Design Using Linear Parameter-Varying Feedback
G00-086 Robust Nonlinear Control of a Hypersonic Aircraft
G00-062 Robust Variable Structure Controller Design for Fault Tolerant Flight Control

Artificial Intelligence

G00-103 Neural-Network-Based Autonomous Star Identification Algorithm

Astrodynamics

G00-019 Chaos Analysis on Librational Control of Gravity-Gradient Satellite in Elliptic Orbit
G00-134 Equations For Approximate Solutions Using Variational Calculus
G00-067 Evaluation of the Dynamic Environment of an Asteroid: Applications to 433 Eros
G00-068 Fuel-Optimal Planar Earth–Mars Trajectories Using Low-Thrust Exhaust-Modulated Propulsion
G00-051 Improved Method for Calculating Exact Geodetic Latitude and Altitude Revisited
G00-088 Minimum-Time Constant Acceleration Orbit Transfer with First-Order Oblateness Effect
G00-137 Passive Nutation Control of Spinning Spacecraft Through the Use of Multiple Booms
G00-159 Payload Mass Fractions for Minimum-Time Trajectories of Flat and Compound Solar Sails
G00-116 Periodic Solutions for Spinning Asymmetric Rigid Bodies with Constant Principal-Axis Torque
G00-011 Postcapture Dynamics of a Spacecraft-Manipulator-Payload System
G00-114 Probability of Collision Between Space Objects
G00-013 Quadratic-Based Computation of Four-Impulse Optimal Rendezvous near Circular Orbit
G00-078 Reduction of Propagated Satellite Yaw Errors Using Orbital Rate Coupling
G00-014 Singular Arcs During Aerocruise
G00-024 Space-Based Visible Data Reduction
G00-021 Space-Based Visible Space Surveillance Performance
G00-079 Strategy for Deployment of Multiple Satellites for Collision-Free Relative Orbital Motion
G00-089 Time-Explicit Representation of Relative Motion Between Elliptical Orbits
G00-110 Trajectory-Tracking Guidance Law for Low-Thrust Earth-Orbit Transfers

Avionics Systems

G00-075 Accuracy of the Global Positioning System-Derived Acceleration Vector

Computer Science

G00-002 Design of Fuzzy Logic Guidance Law Against High-Speed Target

Control System Design

G00-060 Accommodating a Class of Actuator Failures in Flight Control Systems
G00-152 Active Flutter Suppression Using Recurrent Neural Networks
G00-123 Adaptive Autopilot Design for Guided Munitions
G00-056 Adaptive Nonlinear Control of Multiple Spacecraft Formation Flying
G00-165 Adaptive Output Feedback Control of a Nonlinear Aeroelastic Structure
G00-087 Aircraft Pitch Control via Second-Order Sliding Technique
G00-040 Automatic Landing System Design Using Fuzzy Logic
G99-014 Comment on "New Design Method for Pulse-Width Modulation Control Systems via Digital Redesign"
G00-168 Control of a Nonlinear Aeroelastic System Using Euler-Lagrange Theory
G00-153 Decentralized Design for Integrated Flight/Propulsion Control of Aircraft
G00-037 Design and Piloted Simulation of a Robust Integrated Flight and Propulsion Controller
G00-029 Design of Cascade Compensators Using Generalized Singular Values
G00-002 Design of Fuzzy Logic Guidance Law Against High-Speed Target
G00-092 Design of Lifted Dual-Rate Digital Controllers for X-38 Vehicle
G00-053 Flight Control Design of an Automatic Landing Flight Experiment Vehicle
G00-148 Gain-Scheduled Control: Relaxing Slow Variation Requirements by Velocity-Based Design
G00-065 Gain-Scheduled Lateral Control of the F-14 Aircraft During Powered Approach Landing
G00-033 Hybrid Control Scheme for Maneuvering Space Multibody Structures
G00-128 Intelligent Adaptive Control of a Tailless Advanced Fighter Aircraft Under Wing Damage
G00-093 Linear Time-Varying Approach to Satellite Attitude Control Using Only Electromagnetic Actuation
G00-073 Loop Shaping Design for Missile Autopilots: Controller Configurations and Weighting Filter Selection
G00-118 Minimum Power Optimum Control of Microsatellite Attitude Dynamics
G00-136 Multi-Input, Multi-Output, Band-Limited Transducer Selection for Disturbance Rejection
G00-090 Multiple On-Off Valve Control for a Launch Vehicle Tank Pressurization System
G00-031 New, Guaranteed Positive Time Update for the Two-Step Optimal Estimator
G00-007 Nonlinear H∞ Method for Control of Wing Rock Motions
G00-112 Nonlinear Life-Extending Control of a Rocket Engine
G00-032 Parameterization of Model Validating Sets for Uncertainty Bound Optimizations
G00-142 Passivity-Based Robust Control with Application to Benchmark Active Controls Technology Wing
G00-154 Quantitative Cross-Feed and Feedback Design of Helicopter in near Hover Flight
G99-014 Reply by the Authors to F. Bernelli-Zazzera and P. Mantegazza
G00-150 Reusable Launch Vehicle Control in Multiple-Time-Scale Sliding Modes
G00-012 Robust Longitudinal Flight Control Design Using Linear Parameter-Varying Feedback
G00-086 Robust Nonlinear Control of a Hypersonic Aircraft
G00-062 Robust Variable Structure Controller Design for Fault Tolerant Flight Control
G00-132 Setpoint Generation for Constant-Velocity Motion of Space-Based Scanners
G00-102 Sliding Mode Control with Optimal Sliding Surfaces for a Missile Autopilot Design
G00-081 Spacecraft Formation Flying: Dynamics and Control

G00-124 State-Space Approach to ∫1-Optimal Robust Tracking
G00-036 System and Disturbance Identification for Feedforward and Feedback Control Applications
G00-035 System Identification in the Presence of Completely Unknown Periodic Disturbances
G00-141 Transonic Flutter Suppression Control Law Design and Wind-Tunnel Test Results
G00-047 Vibration Suppression of Flexible Beams with Bonded Piezotransducers Using Wave-Absorbing Controllers

Control System Effectors

G00-060 Accommodating a Class of Actuator Failures in Flight Control Systems
G00-052 Output Tracking for Actuator Deficient/Redundant Systems: Multiple Piezoactuator Example

Control System Sensors

G00-075 Accuracy of the Global Positioning System-Derived Acceleration Vector

Control Theory

G00-066 Adaptive Hysteresis Model for Model Reference Control with Actuator Hysteresis
G00-087 Aircraft Pitch Control via Second-Order Sliding Technique
G00-015 Analysis of Junction Conditions in Optimal Aeroassisted Orbital Plane Change
G00-019 Chaos Analysis on Librational Control of Gravity-Gradient Satellite in Elliptic Orbit
G00-092 Design of Lifted Dual-Rate Digital Controllers for X-38 Vehicle
G00-108 Finite Element and Runge-Kutta Methods for Boundary-Value and Optimal Control Problems
G00-053 Flight Control Design of an Automatic Landing Flight Experiment Vehicle
G00-148 Gain-Scheduled Control: Relaxing Slow Variation Requirements by Velocity-Based Design
G00-033 Hybrid Control Scheme for Maneuvering Space Multibody Structures
G00-093 Linear Time-Varying Approach to Satellite Attitude Control Using Only Electromagnetic Actuation
G00-113 Output Feedback Variable Structure Control for Uncertain Systems with Input Nonlinearities
G00-018 New Class of Intermediate-Thrust Arcs for Trajectories in Newtonian Gravitational Fields
G00-031 New, Guaranteed Positive Time Update for the Two-Step Optimal Estimator
G00-162 New Method for Extracting the Quaternion from a Rotation Matrix
G00-038 Nonlinear H_∞ Flight Control of General Six-Degree-of-Freedom Motions
G00-082 Optimal Variable-Structure Control Tracking of Spacecraft Maneuvers
G00-032 Parameterization of Model Validating Sets for Uncertainty Bound Optimizations
G00-017 Parametric Robust H2 Control Design Using Iterative Linear Matrix Inequalities Synthesis
G00-034 Procedure for Applying Second-Order Conditions in Optimal Control Problems
G00-058 Receding Horizon Control Lyapunov Function Approach to Suboptimal Regulation of Nonlinear Systems
G00-150 Reusable Launch Vehicle Control in Multiple-Time-Scale Sliding Modes
G00-149 Robust H• Deconvolution and Its Application to Fault Detection
G00-086 Robust Nonlinear Control of a Hypersonic Aircraft
G00-102 Sliding Mode Control with Optimal Sliding Surfaces for a Missile Autopilot Design
G00-081 Spacecraft Formation Flying: Dynamics and Control
G00-124 State-Space Approach to ∫1-Optimal Robust Tracking
G00-035 System Identification in the Presence of Completely Unknown Periodic Disturbances

Differential Games

G00-141 Transonic Flutter Suppression Control Law Design and Wind-Tunnel Test Results
G00-100 Visual Aircraft Identification as a Pursuit-Evasion Game

Dynamics

G00-098 Model Refinement Using Eigensystem Assignment
G00-109 Constrained Motions of Systems with Elastic Members
G00-071 Dynamics of a Variable-Mass, Flexible-Body System
G00-067 Evaluation of the Dynamic Environment of an Asteroid: Applications to 433 Eros
G00-097 Generalization of Foreshortening Through New Reduced Geometrically Nonlinear Structural Formulation
G00-048 Highly Parallelizable Low-Order Dynamics Simulation Algorithm for Multi-Rigid-Body Systems
G00-135 Improved Dispersion of a Fin-Stabilized Projectile Using a Passive Moveable Nose
G00-117 Linear Theory of a Dual-Spin Projectile in Atmospheric Flight
G00-041 Nonlinear Six-Degree-of-Freedom Aircraft Trim
G00-137 Passive Nutation Control of Spinning Spacecraft Through the Use of Multiple Booms
G00-116 Periodic Solutions for Spinning Asymmetric Rigid Bodies with Constant Principal-Axis Torque
G00-069 Rapid Energy Dissipation in a Yo-Yo-Type Wire Boom Deployment System
G00-132 Setpoint Generation for Constant-Velocity Motion of Space-Based Scanners
G00-006 Simulation of Shot Impacts for the M1A1 Tank Gun

Engine Control

G00-153 Decentralized Design for Integrated Flight/Propulsion Control of Aircraft
G00-112 Nonlinear Life-Extending Control of a Rocket Engine

Flight Displays

G00-061 Perspective Predictor/Flight-Path Display with Minimum Pilot Compensation
G00-122 Shared Information Between Pilots and Controllers in Tactical Air Traffic Control

Flight Mechanics

G00-040 Automatic Landing System Design Using Fuzzy Logic
G99-055 Comment on "Does the Phugoid Frequency Depend on Speed?"
G00-088 Minimum-Time Constant Acceleration Orbit Transfer with First-Order Oblateness Effect
G00-042 New Flight Simulator Experiments on Pilot-Involved Oscillations due to Rate Saturation
G00-079 Strategy for Deployment of Multiple Satellites for Collision-Free Relative Orbital Motion

Handling Qualities

G00-042 New Flight Simulator Experiments on Pilot-Involved Oscillations due to Rate Saturation
G00-064 Probabilistic Approach to Aircraft Performance Enhancement in Atmospheric Turbulence
G00-043 Ride Quality of Civil Aircraft from a Probabilistic Viewpoint
G00-063 Simulator Platform Motion Effects on Pilot-Induced Oscillation Prediction

Launch Vehicle Dynamics

G00-071 Dynamics of a Variable-Mass, Flexible-Body System

Launch Vehicle Guidance and Control

G00-150 Reusable Launch Vehicle Control in Multiple-Time-Scale Sliding Modes

Missile Dynamics

G00-135 Improved Dispersion of a Fin-Stabilized Projectile Using a Passive Moveable Nose
G00-006 Simulation of Shot Impacts for the M1A1 Tank Gun
G00-161 Two Projectiles Connected by a Flexible Tether Dropped in the Atmosphere

Missile Guidance and Control

G00-123 Adaptive Autopilot Design for Guided Munitions
G00-087 Aircraft Pitch Control via Second-Order Sliding Technique
G00-158 Closed-Form Solution of Seventh-Order Navigation System for Unaided Flyout
G00-002 Design of Fuzzy Logic Guidance Law Against High-Speed Target
G00-099 Design of Nonsaturating Guidance Systems
G00-085 Fuzzy-Logic-Based Closed-Loop Optimal Law for Homing Missiles Guidance
G00-073 Loop Shaping Design for Missile Autopilots: Controller Configurations and Weighting Filter Selection
G00-106 Multiple Model-Based Terminal Guidance Law
G00-076 Predictive Missile Guidance
G00-102 Sliding Mode Control with Optimal Sliding Surfaces for a Missile Autopilot Design
G00-010 Solving Optimal Control Problems Using hp-Version Finite Elements in Time
G00-131 Three-dimensional Guidance Law for Landing on a Celestial Object
G00-133 Worst-Case Distributions for Performance Evaluation of Proportionally Guided Missiles

Navigation

G00-158 Closed-Form Solution of Seventh-Order Navigation System for Unaided Flyout
G00-057 Federated Kalman Filtering Via Formation of Relation Equations in Augmented State Space
G00-085 Fuzzy-Logic-Based Closed-Loop Optimal Law for Homing Missiles Guidance
G00-051 Improved Method for Calculating Exact Geodetic Latitude and Altitude Revisited

Optimization Techniques

G00-084 Application of a Dichotomic Basis Method to Performance Optimization of Supersonic Aircraft
G00-016 Distribution of Points on a Sphere with Application to Star Catalogs
G00-005 Dual Payload Ascent Trajectory Optimization with a Splash-Down Constraint
G00-054 Exoatmospheric Inteceptor Pulse Motor Optimization with Discrete Bias Removal
G00-057 Federated Kalman Filtering Via Formation of Relation Equations in Augmented State Space

G00-065 Gain-Scheduled Lateral Control of the F-14 Aircraft During Powered Approach Landing
G00-003 Geometric Descent Algorithms for Attitude Determination Using the Global Positioning System
G00-111 Long-Range Performance of Suboptimal Periodic Hypersonic Cruise Trajectories
G00-136 Multi-Input, Multi-Output, Band-Limited Transducer Selection for Disturbance Rejection
G00-018 New Class of Intermediate-Thrust Arcs for Trajectories in Newtonian Gravitational Fields
G00-017 Parametric Robust H_2 Control Design Using Iterative Linear Matrix Inequalities Synthesis
G00-034 Procedure for Applying Second-Order Conditions in Optimal Control Problems
G00-058 Receding Horizon Control Lyapunov Function Approach to Suboptimal Regulation of Nonlinear Systems
G00-157 Robust H_2 Estimation with Application to Robust Fault Detection
G00-010 Solving Optimal Control Problems Using hp-Version Finite Elements in Time
G00-124 State-Space Approach to $\int_1$-Optimal Robust Tracking
G00-100 Visual Aircraft Identification as a Pursuit-Evasion Game

Pointing Systems

G00-107 Class of Rotations Induced by Spherical Polygons
G00-026 Metric Accuracy Improvements of Space-Based Visible Using Spacecraft Attitude Drift Corrections
G00-009 Precision Spacecraft Pointing Using Single-Gimbal Control Moment Gyroscopes with Disturbance
G00-025 Space-Based Visible Metric Accuracy

Redundancy Management

G00-128 Intelligent Adaptive Control of a Tailless Advanced Fighter Aircraft Under Wing Damage
G00-052 Output Tracking for Actuator Deficient/Redundant Systems: Multiple Piezoactuator Example

Signal Processing

G00-149 Robust H_∞ Deconvolution and Its Application to Fault Detection
G00-157 Robust H_2 Estimation with Application to Robust Fault Detection

Software Technology

G00-036 System and Disturbance Identification for Feedforward and Feedback Control Applications
G00-035 System Identification in the Presence of Completely Unknown Periodic Disturbances

Spacecraft Dynamics

G00-056 Adaptive Nonlinear Control of Multiple Spacecraft Formation Flying
G00-160 Collision Dynamics for Space Tethers
G00-118 Minimum Power Optimum Control of Microsatellite Attitude Dynamics
G00-082 Optimal Variable-Structure Control Tracking of Spacecraft Maneuvers
G00-137 Passive Nutation Control of Spinning Spacecraft Through the Use of Multiple Booms
G00-159 Payload Mass Fractions for Minimum-Time Trajectories of Flat and Compound Solar Sails
G00-116 Periodic Solutions for Spinning Asymmetric Rigid Bodies with Constant Principal-Axis Torque
G00-011 Postcapture Dynamics of a Spacecraft-Manipulator-Payload System
G00-009 Precision Spacecraft Pointing Using Single-Gimbal Control Moment Gyroscopes with Disturbance
G00-114 Probability of Collision Between Space Objects
G00-069 Rapid Energy Dissipation in a Yo-Yo-Type Wire Boom Deployment System
G00-146 Safety Constrained Free-Flyer Path Planning at the International Space Station
G00-081 Spacecraft Formation Flying: Dynamics and Control
G00-079 Strategy for Deployment of Multiple Satellites for Collision-Free Relative Orbital Motion

Spacecraft Guidance and Control

G00-056 Adaptive Nonlinear Control of Multiple Spacecraft Formation Flying
G00-095 Attitude Feedback Control: Unconstrained and Nonholonomic Constrained Cases
G00-019 Chaos Analysis on Librational Control of Gravity-Gradient Satellite in Elliptic Orbit
G00-107 Class of Rotations Induced by Spherical Polygons
G99-014 Comment on "New Design Method for Pulse-Width Modulation Control Systems via Digital Redesign"
G00-091 Drag-Based Predictive Tracking Guidance for Mars Precision Landing
G00-105 Experiments of Space Robot Arm Path Planning Using the Sensors Database, Part II
G00-003 Geometric Descent Algorithms for Attitude Determination Using the Global Positioning System
G00-026 Metric Accuracy Improvements of Space-Based Visible Using Spacecraft Attitude Drift Corrections
G00-118 Minimum Power Optimum Control of Microsatellite Attitude Dynamics
G00-008 Mode Localization in Flexible Spacecraft: A Control Challenge
G00-055 Nonlinear Entry Trajectory Control Using Drag-to-Altitude Transformation
G00-082 Optimal Variable-Structure Control Tracking of Spacecraft Maneuvers
G00-009 Precision Spacecraft Pointing Using Single-Gimbal Control Moment Gyroscopes with Disturbance
G00-013 Quadratic-Based Computation of Four-Impulse Optimal Rendezvous near Circular Orbit
G00-078 Reduction of Propagated Satellite Yaw Errors Using Orbital Rate Coupling
G99-014 Reply by the Authors to F. Bernelli-Zazzera and P. Mantegazza
G00-001 Singularity Avoidance Using Null Motion and Variable-Speed Control Moment Gyros
G00-025 Space-Based Visible Metric Accuracy
G00-110 Trajectory-Tracking Guidance Law for Low-Thrust Earth-Orbit Transfers

State Estimation

G00-082 Optimal Variable-Structure Control Tracking of Spacecraft Maneuvers
G00-075 Accuracy of the Global Positioning System-Derived Acceleration Vector
G00-030 Attitude-Determination Filtering via Extended Quaternion Estimation
G00-096 Decentralized State Estimation for Flexible Space Structures
G00-057 Federated Kalman Filtering Via Formation of Relation Equations in Augmented State Space
G00-031 New, Guaranteed Positive Time Update for the Two-Step Optimal Estimator
G00-149 Robust H_∞ Deconvolution and Its Application to Fault Detection
G00-157 Robust H_2 Estimation with Application to Robust Fault Detection

Structural Control

G00-152 Active Flutter Suppression Using Recurrent Neural Networks
G00-029 Design of Cascade Compensators Using Generalized Singular Values
G00-145 Identification and Retuning of Optimum Delayed Feedback Vibration Absorber
G00-008 Mode Localization in Flexible Spacecraft: A Control Challenge
G00-136 Multi-Input, Multi-Output, Band-Limited Transducer Selection for Disturbance Rejection
G00-070 Optimal Vibration Control of Thin-Walled Anisotropic Cantilevers Exposed to Blast Loadings
G00-017 Parametric Robust H2 Control Design Using Iterative Linear Matrix Inequalities Synthesis
G00-036 System and Disturbance Identification for Feedforward and Feedback Control Applications

System Identification

G00-098 Model Refinement Using Eigensystem Assignment
G00-059 Closed-Loop System Identification by Residual Whitening
G00-138 Frequency-Domain Recursive Robust Indentification
G00-032 Parameterization of Model Validating Sets for Uncertainty Bound Optimizations
G00-120 Real-Time Parameter Estimation in the Frequency Domain
G00-121 Structural Identification Using Inverse System Dynamics

Trajectory Optimization

G00-015 Analysis of Junction Conditions in Optimal Aeroassisted Orbital Plane Change
G00-084 Application of a Dichotomic Basis Method to Performance Optimization of Supersonic Aircraft
G00-127 Direct Method for Rapid Prototyping of Near-Optimal Aircraft Trajectories
G00-005 Dual Payload Ascent Trajectory Optimization with a Splash-Down Constraint

G00-068 Fuel-Optimal Planar Earth–Mars Trajectories Using Low-Thrust Exhaust-Modulated Propulsion
G00-088 Minimum-Time Constant Acceleration Orbit Transfer with First-Order Oblateness Effect
G00-018 New Class of Intermediate-Thrust Arcs for Trajectories in Newtonian Gravitational Fields
G00-034 Procedure for Applying Second-Order Conditions in Optimal Control Problems

G00-013 Quadratic-Based Computation of Four-Impulse Optimal Rendezvous near Circular Orbit
G00-058 Receding Horizon Control Lyapunov Function Approach to Suboptimal Regulation of Nonlinear Systems
G00-014 Singular Arcs During Aerocruise
G00-010 Solving Optimal Control Problems Using hp-Version Finite Elements in Time
G00-100 Visual Aircraft Identification as a Pursuit-Evasion Game

Interdisciplinary Topics

Analytical and Numerical Methods

G00-151 A Novel Method for Identification of Aircraft Trajectories in Three-Dimensional Space
G00-030 Attitude-Determination Filtering via Extended Quaternion Estimation
G00-016 Distribution of Points on a Sphere with Application to Star Catalogs
G00-134 Equations For Approximate Solutions Using Variational Calculus
G00-108 Finite Element and Runge-Kutta Methods for Boundary-Value and Optimal Control Problems
G00-048 Highly Parallelizable Low-Order Dynamics Simulation Algorithm for Multi-Rigid-Body Systems
G00-133 Worst-Case Distributions for Performance Evaluation of Proportionally Guided Missiles

Human Factors

G00-050 Computational Simulation of Extravehicular Activity Dynamics During a Satellite Capture Attempt
G00-122 Shared Information Between Pilots and Controllers in Tactical Air Traffic Control

Sensor Systems

G00-022 Space-Based Visible Space Object Photometry: Initial Results

Launch Vehicle and Missile (LV/M) Technology

Launch Vehicle and Sounding Rocket Systems

G00-090 Multiple On-Off Valve Control for a Launch Vehicle Tank Pressurization System

Missile Systems

G00-054 Exoatmospheric Inteceptor Pulse Motor Optimization with Discrete Bias Removal
G00-161 Two Projectiles Connected by a Flexible Tether Dropped in the Atmosphere

Propulsion and Propellant Systems

G00-054 Exoatmospheric Inteceptor Pulse Motor Optimization with Discrete Bias Removal

Simulation

G00-006 Simulation of Shot Impacts for the M1A1 Tank Gun

Trajectories and Tracking Systems

G00-151 A Novel Method for Identification of Aircraft Trajectories in Three-Dimensional Space

Propulsion

Electric and Advanced Space Propulsion

G00-068 Fuel-Optimal Planar Earth–Mars Trajectories Using Low-Thrust Exhaust-Modulated Propulsion

Liquid Rocket Motors and Missile Systems

G00-090 Multiple On-Off Valve Control for a Launch Vehicle Tank Pressurization System

Solid Rocket Motors and Missile Systems

G00-071 Dynamics of a Variable-Mass, Flexible-Body System

Space Technology

Aerobraking Flight Mechanics

G00-015 Analysis of Junction Conditions in Optimal Aeroassisted Orbital Plane Change

Humans in Space/Life Support Systems, EVA

G00-050 Computational Simulation of Extravehicular Activity Dynamics During a Satellite Capture Attempt
G00-146 Safety Constrained Free-Flyer Path Planning at the International Space Station

Landers

G00-091 Drag-Based Predictive Tracking Guidance for Mars Precision Landing

Mission Design and Analysis

G00-067 Evaluation of the Dynamic Environment of an Asteroid: Applications to 433 Eros
G00-146 Safety Constrained Free-Flyer Path Planning at the International Space Station
G00-089 Time-Explicit Representation of Relative Motion Between Elliptical Orbits

Mission Trajectories (Earth and Interplanetary)

G00-051 Improved Method for Calculating Exact Geodetic Latitude and Altitude Revisited
G00-159 Payload Mass Fractions for Minimum-Time Trajectories of Flat and Compound Solar Sails
G00-089 Time-Explicit Representation of Relative Motion Between Elliptical Orbits

Space Experiments

G00-022 Space-Based Visible Space Object Photometry: Initial Results

Space Systems

G00-050 Computational Simulation of Extravehicular Activity Dynamics During a Satellite Capture Attempt

Spacecraft Attitude Determination

G00-030 Attitude-Determination Filtering via Extended Quaternion Estimation

Chronological Index

G99-014 New Design Method for Pulse-Width Modulation Control Systems via Digital Redesign. Tohru Ieko, Yoshimasa Ochi, and Kimio Kanai, *National Defense Academy, Japan* (**22**, 1, p. 123) Article Technical Comment by Franco Bernelli-Zazzera and Paolo Mantegazza, *Politecnico di Milano* (**23**, 2, p. 381)
Reply (**23**, 2, p. 382)

G99-055 Does the Phugoid Frequency Depend on Speed? S. Pradeep, *Indian Institute of Science*, and S. Kamesh, *Aeronautical Development Agensy, India* (**22**, 2, p. 372) Engineering Note
Technical Comment by N. Ananthkrishnan, *Indian Institute of Technology* (**23**, 4, p. 765)
Reply (**23**, 4, p. 766)

G00-001 Singularity Avoidance Using Null Motion and Variable-Speed Control Moment Gyros. Hanspeter Schaub and John L. Junkins, *Texas A&M University* (**23**, 1, p. 11) Article

G00-002 Design of Fuzzy Logic Guidance Law Against High-Speed Target. Chun-Liang Lin, *Feng Chia University*; and Yung-Yue Chen, *National Tsing Hua University* (**23**, 1, p. 17) Article

G00-003 Geometric Descent Algorithms for Attitude Determination Using the Global Positioning System. F. C. Park, Junggon Kim, and Changdon Kee, *Seoul National University* (**23**, 1, p. 26) Article

G00-004 Two New Classes of Strapdown Navigation Algorithms. Yury A. Litmanovich, Vladimir M. Lesyuchevsky, and Valery Z. Gusinsky, *Central Scientific and Research Institute "Elektropribor"* (**23**, 1, p. 34) Article

G00-005 Dual Payload Ascent Trajectory Optimization with a Splash-Down Constraint. Nicolas Weigel and Klaus H. Well, *University of Stuttgart* (**23**, 1, p. 45) Article

G00-006 Simulation of Shot Impacts for the M1A1 Tank Gun. Ronald Gast and Steven Morris, *Benet Laboratories*; and Mark Costello, *Oregon State University* (**23**, 1, p. 53) Article

G00-007 Nonlinear H_∞ Method for Control of Wing Rock Motions. Shyh-Pyng Shue and Ramesh K. Agarwal, *Wichita State University*; and Peng Shi, *University of South Australia* (**23**, 1, p. 60) Article

G00-008 Mode Localization in Flexible Spacecraft: A Control Challenge. Robert E. Zee and Peter C. Hughes, *University of Toronto* (**23**, 1, p. 69) Article

G00-009 Precision Spacecraft Pointing Using Single-Gimbal Control Moment Gyroscopes with Disturbance. Christopher J. Heiberg and David Bailey, *Honeywell, Inc.*; and Bong Wie, *Arizona State University* (**23**, 1, p. 77) Article

G00-010 Solving Optimal Control Problems Using *hp*-Version Finite Elements in Time. Michael S. Warner and Dewey H. Hodges, *Georgia Institute of Technology* (**23**, 1, p. 86) Article

G00-011 Postcapture Dynamics of a Spacecraft-Manipulator-Payload System. Xavier Cyril, *CAE Electronics, Ltd.*; Arun K. Misra and Michel D. Ingham, *McGill University*; and Gilbert J. Jaar, *CAE Electronics, Ltd.* (**23**, 1, p. 95) Article

G00-012 Robust Longitudinal Flight Control Design Using Linear Parameter-Varying Feedback. Mark S. Spillman, *U.S. Air Force Research Laboratory* (**23**, 1, p. 101) Article

G00-013 Quadratic-Based Computation of Four-Impulse Optimal Rendezvous near Circular Orbit. Thomas E. Carter, *Eastern Connecticut State University*; and Sergio A. Alvarez, *Worcester Polytechnic Institute* (**23**, 1, p. 109) Article based on AIAA Paper 98-4546

G00-014 Singular Arcs During Aerocruise. Lorenzo Casalino, *Politencnico di Torino* (**23**, 1, p. 118) Article

G00-015 Analysis of Junction Conditions in Optimal Aeroassisted Orbital Plane Change. Sang-Young Park, *Naval Postgraduate School* (**23**, 1, p. 124) Article

G00-016 Distribution of Points on a Sphere with Application to Star Catalogs. Robert Bauer, (**23**, 1, p. 130) Article based on AIAA Paper 98-4330

G00-017 Parametric Robust H_2 Control Design Using Iterative Linear Matrix Inequalities Synthesis. David Banjerdpongchai, *Chulalongkorn University*; and Jonathan P. How, *Stanford University* (**23**, 1, p. 138) Engineering Note

G00-018 New Class of Intermediate-Thrust Arcs for Trajectories in Newtonian Gravitational Fields. D. M. Azimov, *Tashkent State University* (**23**, 1, p. 142) Engineering Note

G00-019 Chaos Analysis on Librational Control of Gravity-Gradient Satellite in Elliptic Orbit. Hironori A. Fujii, Wakano Ichiki, Shin-ichi Suda, and Takeo R. Watanabe, *Tokyo Metropolitan Institute of Technology* (**23**, 1, p. 145) Engineering Note

G00-020 Space-Based Space Surveillance with the Space-Based Visible. E. Michael Gaposchkin, Curt von Braun and Jayant Sharma, *Lincoln Laboratory, Massachusetts Institute of Technology* (**23**, 1, p. 148) Article

G00-021 Space-Based Visible Space Surveillance Performance. Jayant Sharma, *Lincoln Laboratory, Massachusetts Institute of Technology* (**23**, 1, p. 153) Article

G00-022 Space-Based Visible Space Object Photometry: Initial Results. R. Lambour and R. Bergemann, C. von Braun, and E. Michael Gaposchkin, *Lincoln Laboratory, Massachusetts Institute of Technology* (**23**, 1, p. 159) Article

G00-023 Mission Planning for Space-Based Surveillance with the Space-Based Visible Sensor. W. F. Burnham, F. E. Morton, Jr., R. Sridharan, H. E. M. Viggh, A. J. Wiseman, and G. R. Zollinger, *Lincoln Laboratory, Massachusetts Institute of Technology* (**23**, 1, p. 165) Article

G00-024 Space-Based Visible Data Reduction. J. Sharma, C. von Braun and E. M. Gaposchkin, *Lincoln Laboratory, Massachusetts Institute of Technology* (**23**, 1, p. 170) Article

G00-025 Space-Based Visible Metric Accuracy. Curt von Braun, Jayant Sharma and E. Michael Gaposchkin, *Lincoln Laboratory, Massachusetts Institute of Technology* (**23**, 1, p. 175) Article

G00-026 Metric Accuracy Improvements of Space-Based Visible Using Spacecraft Attitude Drift Corrections. Curt von Braun and E. Michael Gaposchkin, *Lincoln Laboratory, Massachusetts Institute of Technology* (**23**, 1, p. 182) Article

G00-027 Midcourse Space Experiment Precision Ephemeris. Richard I. Abbot, E. Michael Gaposchkin and Curt von Braun, *Lincoln Laboratory, Massachusetts Institute of Technology* (**23**, 1, p. 186) Article

G00-028 Receding Horizon Guidance Laws with No Information on the Time-to-Go. Ki Baek Kim, Myung-Joon Kim, and Wook Hyun Kwon, *Seoul National University* (**23**, 2, p. 193) Article

G00-029 Design of Cascade Compensators Using Generalized Singular Values. Mario A. Rotea, *Purdue University* (**23**, 2, p. 200) Article

G00-030 Attitude-Determination Filtering via Extended Quaternion Estimation. Mark L. Psiaki, *Cornell University* (**23**, 2, p. 206) Article

G00-031 New, Guaranteed Positive Time Update for the Two-Step Optimal Estimator. N. Jeremy Kasdin, *Princeton University* (**23**, 2, p. 215) Engineering Note
Technical Comment by Michael E. Lisano, *LinCom Corporation* (**23**, 6, p. 1088)
Reply (**23**, 6, p. 1090)

G00-032 Parameterization of Model Validating Sets for Uncertainty Bound Optimizations. K. B. Lim and D. P. Giesy, *NASA Langley Research Center* (**23**, 2, p. 222) Article based on AIAA Paper 98-4135

G00-033 Hybrid Control Scheme for Maneuvering Space Multibody Structures. P. Di Giamberardino and S. Monaco, *University of Rome "La Sapienza"*; and D. Normand-Cyrot, *École Supérieure d'Électricité* (**23**, 2, p. 231) Article

G00-034 Procedure for Applying Second-Order Conditions in Optimal Control Problems. Jang-Won Jo and John E. Prussing, *University of Illinois at Urbana–Champaign* (**23**, 2, p. 241) Article

G00-035 System Identification in the Presence of Completely Unknown Periodic Disturbances. Neil E. Goodzeit and Minh Q. Phan, *Princeton University* (**23**, 2, p. 251) Article

G00-036 System and Disturbance Identification for Feedforward and Feedback Control Applications. Neil E. Goodzeit and Minh Q. Phan, *Princeton University* (**23**, 2, p. 260) Article based on AIAA Paper 97-0682

G00-037 Design and Piloted Simulation of a Robust Integrated Flight and Propulsion Controller. Declan G. Bates, Sarah L. Gatley and Ian Postlethwaite, *University of Leicester*; and Andrew J. Berry, *Defence and Evaluation Research Agency* (**23**, 2, p. 269) Article

G00-038 Nonlinear H_∞ Flight Control of General Six-Degree-of-Freedom Motions. Ciann-Dong Yang and Chien-Chung Kung, *National Cheng-Kung University* (**23**, 2, p. 278) Article

G00-039 Optimization-Based Inverse Simulation of a Helicopter Slalom Maneuver. Roberto Celi, *University of Maryland* (**23**, 2, p. 289) Article

G00-040 Automatic Landing System Design Using Fuzzy Logic. Kyungmoon Nho and Ramesh K. Agarwal, *Wichita State University* (**23**, 2, p. 298) Article

G00-041 Nonlinear Six-Degree-of-Freedom Aircraft Trim. Michael R. Elgersma and Blaise G. Morton, *Honeywell, Inc.* (**23**, 2, p. 305) Article

G00-042 New Flight Simulator Experiments on Pilot-Involved Oscillations due to Rate Saturation. Holger Duda and Gunnar Duus, *DLR, German Aerospace Research Center*; and Gunnar Hovmark and Lars Forssell, *FFA, Aeronautical Research Institute of Sweden* (**23**, 2, p. 312) Article based on AIAA Paper 98-4336

G00-043 Ride Quality of Civil Aircraft from a Probabilistic Viewpoint. Giovanni Mengali and Andrea Pieracci, *University of Pisa* (**23**, 2, p. 319) Article

G00-044 Design of a Robust Adaptive Longitudinal Flight Control. Charles H. Dillon and Jason L. Speyer, *University of California, Los Angeles* (**23**, 2, p. 325) Article

G00-045 Simple Analytic Model of the Long-Term Evolution of Nanosatellite Constellations. Colin R. McInnes, *University of Glasgow* (**23**, 2, p. 332) Article

G00-046 Fuel Optimization for Constrained Rotation of Spacecraft Formations. Randal W. Beard and Timothy W. McLain, *Brigham Young University*; and Fred Y. Hadaegh, *Jet Propulsion Laboratory, California Institute of Technology* (**23**, 2, p. 339) Article

G00-047 Vibration Suppression of Flexible Beams with Bonded Piezotransducers Using Wave-Absorbing Controllers. A. Yousefi-Koma and G. Vukovich, *Canadian Space Agency* (**23**, 2, p. 347) Article

G00-048 Highly Parallelizable Low-Order Dynamics Simulation Algorithm for Multi-Rigid-Body Systems. Kurt S. Anderson and Shanzhong Duan, *Rensselaer Polytechnic Institute* (**23**, 2, p. 355) Article

G00-049 Closed-Form Solution of Line-of-Sight Trajectory for Nonmaneuvering Targets. S. H. Jalali-Naini and V. Esfahanian, *Tehran University* (**23**, 2, p. 365) Engineering Note

G00-050 Computational Simulation of Extravehicular Activity Dynamics During a Satellite Capture Attempt. Grant Schaffner and Dava J. Newman, *Massachusetts Institute of Technology*; and Stephen K. Robinson, *NASA Johnson Space Center* (**23**, 2, p. 367) Engineering Note

G00-051 Improved Method for Calculating Exact Geodetic Latitude and Altitude Revisited. I. Sofair, *U.S. Naval Surface Warfare Center* (**23**, 2, p. 369) Engineering Note

G00-052 Output Tracking for Actuator Deficient/Redundant Systems: Multiple Piezoactuator Example. Rob Brinkerhoff and Santosh Devasia, *University of Utah* (**23**, 2, p. 370) Engineering Note

G00-053 Flight Control Design of an Automatic Landing Flight Experiment Vehicle. Atsushi Fujimori and Munerou Kurozumi, *Shizuoka University*; and Peter N. Nikiforuk and Madan M. Gupta, *University of Saskatchewan* (**23**, 2, p. 373) Engineering Note based on AIAA Paper 99-4057

G00-054 Exoatmospheric Inteceptor Pulse Motor Optimization with Discrete Bias Removal. Craig A. Phillips and D. Stephen Malyevac, *U.S. Naval Surface Warfare Center* (**23**, 2, p. 376) Engineering Note

G00-055 Nonlinear Entry Trajectory Control Using Drag-to-Altitude Transformation. Shinji Ishimoto, *National Aerospace Laboratory* (**23**, 2, p. 378) Engineering Note based on AIAA Paper 99-4169

G00-056 Adaptive Nonlinear Control of Multiple Spacecraft Formation Flying. Marcio S. de Queiroz, Vikram Kapila, and Qiguo Yan, *Polytechnic University* (**23**, 3, p. 385) Article based on AIAA Paper 99-4270

G00-057 Federated Kalman Filtering Via Formation of Relation Equations in Augmented State Space. V. A. Tupysev, *Elektropribor* (**23**, 3, p. 391) Article based on AIAA Paper 98-4309

G00-058 Receding Horizon Control Lyapunov Function Approach to Suboptimal Regulation of Nonlinear Systems. M. Sznaier, *Pennsylvania State University*; J. Cloutier, *U.S. Air Force Research Laboratory*; R. Hull, *Coleman Research Corporation*; D. Jacques and C. Mracek, *U.S. Air Force Institute of Technology* (**23**, 3, p. 399) Article

G00-059 Closed-Loop System Identification by Residual Whitening. Chien-Hsun Kuo, *Old Dominion University*; Marco P. Schoen, *Indiana Institute of Technology*; and Sinchai Chinvorarat and J.-K. Huang, *Old Dominion University* (**23**, 3, p. 406) Article

G00-060 Accommodating a Class of Actuator Failures in Flight Control Systems. R. A. Hess, W. Siwakosit, and J. Chung, *University of California, Davis* (**23**, 3, p. 412) Article

G00-061 Perspective Predictor/Flight-Path Display with Minimum Pilot Compensation. Gottfried Sachs, *Technical University of Munich* (**23**, 3, p. 420) Article

G00-062 Robust Variable Structure Controller Design for Fault Tolerant Flight Control. Dohyeon Kim and Youdan Kim, *Seoul National University* (**23**, 3, p. 430) Article

G00-063 Simulator Platform Motion Effects on Pilot-Induced Oscillation Prediction. Jeffrey A. Schroeder, *NASA Ames Research Center*; and William W. Y. Chung, *Logicon Information Systems and Services* (**23**, 3, p. 438) Article based on AIAA Paper 98-4333

G00-064 Probabilistic Approach to Aircraft Performance Enhancement in Atmospheric Turbulence. Giovanni Mengali and Andrea Pieracci, *Unversity of Pisa* (**23**, 3, p. 445) Article

G00-065 Gain-Scheduled Lateral Control of the F-14 Aircraft During Powered Approach Landing. Ian Fialho and Gary J. Balas, *University of Minnesota*; Andrew K. Packard, *University of California*; and Joseph Renfrow and Chris Mullaney, *Naval Air Warfare Center* (**23**, 3, p. 450) Article

G00-066 Adaptive Hysteresis Model for Model Reference Control with Actuator Hysteresis. G. Webb, *Texas A&M University*; A. Kurdila, *University of Florida*; and D. Lagoudas, *Texas A&M University* (**23**, 3, p. 459) Article

G00-067 Evaluation of the Dynamic Environment of an Asteroid: Applications to 433 Eros. D. J. Scheeres, *University of Michigan*; and B. G. Williams and J. K. Miller, *Jet Propulsion Laboratory, California Institute of Technology* (**23**, 3, p. 466) Article

G00-068 Fuel-Optimal Planar Earth–Mars Trajectories Using Low-Thrust Exhaust-Modulated Propulsion. S. R. Vadali and R. Nah, *Texas A&M University*; and E. Braden, I. L. Johnson, Jr., *NASA Johnson Space Center* (**23**, 3, p. 476) Article

G00-069 Rapid Energy Dissipation in a Yo-Yo-Type Wire Boom Deployment System. Mark L. Psiaki, Paul M. Kintner, Jr., and Steven P. Powell, *Cornell University* (**23**, 3, p. 483) Article

G00-070 Optimal Vibration Control of Thin-Walled Anisotropic Cantilevers Exposed to Blast Loadings. Sungsoo Na, *Korea Polytechnic University*; and Liviu Librescu, *Virginia Polytechnic Institute and State University* (**23**, 3, p. 491) Article

G00-071 Dynamics of a Variable-Mass, Flexible-Body System. Arun K. Banerjee, *Lockheed Martin Advanced Technology Center* (**23**, 3, p. 501) Article

G00-072 Optimal Size and Location of Piezoelectric Actuator/Sensors: Practical Considerations. Osama J. Aldraihem, *King Saud University*; and Tarunraj Singh and Robert C. Wetherhold, *State University of New York* (**23**, 3, p. 509) Article

G00-073 Loop Shaping Design for Missile Autopilots: Controller Configurations and Weighting Filter Selection. Pablo A. Iglesias, *Johns Hopkins University*; and Thomas J. Urban, *Johns Hopkins University, Applied Physics Laboratory* (**23**, 3, p. 516) Article based on AIAA Paper 99-3973

G00-074 Fast-Time Study of Airline-Influenced Arrival Sequencing and Scheduling. Gregory C. Carr and Heinz Erzberger, *NASA Ames Research Center*; and Frank Neuman, *Raytheon STX Corporation* (**23**, 3, p. 526) Article

G00-075 Accuracy of the Global Positioning System-Derived Acceleration Vector. Mark L. Psiaki, Steven P. Powell, Paul M. Kintner, Jr., *Cornell University* (**23**, 3, p. 532) Article based on AIAA Paper 99-4079

G00-076 Predictive Missile Guidance. R. A. Best, *BAe Systems*; and J. P. Norton, *University of Birmingham* (**23**, 3, p. 539) Article

G00-077 Neural Networks and Adaptive Nonlinear Control of Agile Antiair Missiles. Michael B. McFarland, *U.S. Air Force Research Laboratory*; and Anthony J. Calise, *Georgia Institute of Technology* (**23**, 3, p. 547) Article

G00-078 Reduction of Propagated Satellite Yaw Errors Using Orbital Rate Coupling. Dominick Bruno, *Orbital Sciences Corporation* (**23**, 3, p. 554) Engineering Note based on AIAA Paper 98-4511

G00-079 Strategy for Deployment of Multiple Satellites for Collision-Free Relative Orbital Motion. R. V. Ramanan, *Vikram Sarabhai Space Center* (**23**, 3, p. 556) Engineering Note

G00-080 Minimization of Vibration of Spacecraft Appendages During Shape Control Using Smart Structures. Serdar Kalaycioglu and David Silva, *Canadian Space Agency* (**23**, 3, p. 558) Engineering Note

G00-081 Spacecraft Formation Flying: Dynamics and Control. Vikram Kapila, *Polytechnic University*; Andrew G. Sparks, *U.S. Air Force Research Laboratory*; James M. Buffington, *Lockheed Martin Tactical Aircraft Systems*; and Qiguo Yan, *Polytechnic University* (**23**, 3, p. 561) Engineering Note

G00-082 Optimal Variable-Structure Control Tracking of Spacecraft Maneuvers. John L. Crassidis and Srinivas R. Vadali, *Texas A&M University*; and F. Landis Markley, *NASA Goddard Space Flight Center* (**23**, 3, p. 564) Engineering Note

G00-083 Parameters Selection for Baumgarte's Constraint Stabilization Method Using the Predictor-Corrector Approach. Shih-Tin Lin and Jiann-Nan Huang, *National Chung-Hsing University* (**23**, 3, p. 566) Engineering Note

G00-084 Application of a Dichotomic Basis Method to Performance Optimization of Supersonic Aircraft. Anil V. Rao, *Princeton University* (**23**, 3, p. 570) Engineering Note

G00-085 Fuzzy-Logic-Based Closed-Loop Optimal Law for Homing Missiles Guidance. N. Rahbar and M. B. Menhaj, *Amir Kabir University of Technology* (**23**, 3, p. 573) Engineering Note

G00-086 Robust Nonlinear Control of a Hypersonic Aircraft. Qian Wang and Robert F. Stengel, *Princeton University* (**23**, 4, p. 577) Article
Errata (**23**, 5, p. 911)

G00-087 Aircraft Pitch Control via Second-Order Sliding Technique. A. Levant and A. Pridor, *Institute for Industrial Mathematics*; R. Gitizadeh and I. Yaesh, *Israel Military Industries, Ltd.*; and J. Z. Ben-Asher, *Technion—Israel Institute of Technology* (**23**, 4, p. 586) Article

G00-088 Minimum-Time Constant Acceleration Orbit Transfer with First-Order Oblateness Effect. Jean Albert Kechichian, *The Aerospace Corporation* (**23**, 4, p. 595) Article

G00-089 Time-Explicit Representation of Relative Motion Between Elliptical Orbits. Robert G. Melton, *Pennsylvania State University* (**23**, 4, p. 604) Article

G00-090 Multiple On-Off Valve Control for a Launch Vehicle Tank Pressurization System. Perry W. Stout and S. Antony Snell, *University of California, Davis* (**23**, 4, p. 611) Article

G00-091 Drag-Based Predictive Tracking Guidance for Mars Precision Landing. Kuang-Yang Tu, Mohammad S. Munir, and Kenneth D. Mease, *University of California, Irvine*; and David S. Bayard, *Jet Propulsion Lab, California Institute of Technology* (**23**, 4, p. 620) Article

G00-092 Design of Lifted Dual-Rate Digital Controllers for X-38 Vehicle. Leang-San Shieh and Wei-Min Wang, *University of Houston*; John Bain, *NASA Johnson Space Center*; and John W. Sunkel, *University of Colorado at Boulder* (**23**, 4, p. 629) Article

G00-093 Linear Time-Varying Approach to Satellite Attitude Control Using Only Electromagnetic Actuation. Rafal Wisniewski, *Aalborg University* (**23**, 4, p. 640) Article
Errata (**23**, 5, p. 911)

G00-094 Singular Direction Avoidance Steering for Control-Moment Gyros. Kevin A. Ford and Christopher D. Hall, *Air Force Institute of Technology* (**23**, 4, p. 648) Article

G00-095 Attitude Feedback Control: Unconstrained and Nonholonomic Constrained Cases. Michele Aicardi, Giorgio Cannata, and Giuseppe Casalino, *University of Genova* (**23**, 4, p. 657) Article

G00-096 Decentralized State Estimation for Flexible Space Structures. Gregory J. W. Mallory and David W. Miller, *Massachusetts Institute of Technology* (**23**, 4, p. 665) Article

G00-097 Generalization of Foreshortening Through New Reduced Geometrically Nonlinear Structural Formulation. Javier Urruzola, Juan Tomás Celigüeta and Javier García de Jalón, *University of Navarre* (**23**, 4, p. 673) Article

G00-098 Model Refinement Using Eigensystem Assignment. Peiman G. Maghami, *NASA Langley Research Center* (**23**, 4, p. 683) Article

G00-099 Design of Nonsaturating Guidance Systems. Pini Gurfil and Mario Jodorkovsky, *RAFAEL*; and Moshe Guelman, *Technion-Israel Institute of Technology* (**23**, 4, p. 693) Article

G00-100 Visual Aircraft Identification as a Pursuit-Evasion Game. Tuomas Raivio and Harri Ehtamo, *Helsinki University of Technology* (**23**, 4, p. 701) Article

G00-101 Design of Reliable Control Systems Possessing Actuator Redundancies. Jin Jiang, *University of Western Ontario*; and Qing Zhao, *University of Manitoba* (**23**, 4, p. 709) Article

G00-102 Sliding Mode Control with Optimal Sliding Surfaces for a Missile Autopilot Design. Metin U. Salamci and M. Kemal Özgören, *Middle East Technical University*; and Stephen P. Banks, *University of Sheffield* (**23**, 4, p. 719) Article

G00-103 Neural-Network-Based Autonomous Star Identification Algorithm. Jian Hong and Julie A. Dickerson, *Iowa State University* (**23**, 4, p. 728) Article

G00-104 Modeling of Nonlinear Human Operator in the Control Loop: Preliminary Results. Mario Innocenti, Andrea Balluchi, and Aldo Balestrino, *University of Pisa* (**23**, 4, p. 736) Engineering Note

G00-105 Experiments of Space Robot Arm Path Planning Using the Sensors Database, Part II. Toshiaki Iwata, *Electrotechnical Laboratory*; Seiya Ueno, *Yokohama National University*; and Hiroshi Murakami, *Electrotechnical Laboratory* (**23**, 4, p. 739) Engineering Note

G00-106 Multiple Model-Based Terminal Guidance Law. Ilan Rusnak, *RAFAEL* (**23**, 4, p. 742) Engineering Note

G00-107 Class of Rotations Induced by Spherical Polygons. Ranjan Mukherjee and Jay T. Pukrushpan, *Michigan State University* (**23**, 4, p. 746) Engineering Note

G00-108 Finite Element and Runge-Kutta Methods for Boundary-Value and Optimal Control Problems. Carlo L. Bottasso and Andrea Ragazzi, *Politecnico di Milano* (**23**, 4, p. 749) Engineering Note

G00-109 Constrained Motions of Systems with Elastic Members. Shlomo Djerassi, *RAFAEL* (**23**, 4, p. 751) Engineering Note

G00-110 Trajectory-Tracking Guidance Law for Low-Thrust Earth-Orbit Transfers. Craig A. Kluever and Daniel J. O'Shaughnessy, *University of Missouri-Columbia* (**23**, 4, p. 754) Engineering Note

G00-111 Long-Range Performance of Suboptimal Periodic Hypersonic Cruise Trajectories. Lael von Eggers Rudd and Darryll J. Pines, *University of Maryland*; and Preston H. Carter II, *Lawrence Livermore National Laboratory* (**23**, 4, p. 756) Engineering Note

G00-112 Nonlinear Life-Extending Control of a Rocket Engine. Carl F. Lorenzo, *NASA John Glenn Research Center at Lewis Field*; and Michael S. Holmes and Asok Ray, *The Pennsylvania State University* (**23**, 4, p. 759) Engineering Note

G00-113 Output Feedback Variable Structure Control for Uncertain Systems with Input Nonlinearities. Yi Shen, Chunmei Liu, and Hengzhang Hu, *Harbin Institute of Technology* (**23**, 4, p. 762) Engineering Note

G00-114 Probability of Collision Between Space Objects. Maruthi R. Akella and Kyle T. Alfriend, *Texas A&M University*; (**23**, 5, p. 769) Article based on AIAA Paper 98-4279

G00-115 Attitude Control of a Bias Momentum Geostationary Satellite in an Inclined Orbit. Hyochoong Bang and BangYeop Kim, *Korea Aerospace Research Institute*; and Han Hwangbo, *Korea Telecom* (**23**, 5, p. 773) Article

G00-116 Periodic Solutions for Spinning Asymmetric Rigid Bodies with Constant Principal-Axis Torque. R. Anne Gick, Marc H. Williams, and James M. Longuski, *Purdue University* (**23**, 5, p. 781) Article

G00-117 Linear Theory of a Dual-Spin Projectile in Atmospheric Flight. Mark Costello and Allen Peterson, *Oregon State University* (**23**, 5, p. 789) Article

G00-118 Minimum Power Optimum Control of Microsatellite Attitude Dynamics. Michele Grassi, *University of Naples "Federico II"*; and Massimiliano Pastena, *Second University of Naples* (**23**, 5, p. 798) Article

G00-119 Truth Models for Articulating Flexible Multibody Dynamic Systems. Theodore G. Mordfin, *CSC Advanced Marine* and Sivakumar S. K. Tadikonda, *Catholic University of America* (**23**, 5, p. 805) Article

G00-120 Real-Time Parameter Estimation in the Frequency Domain. Eugene A. Morelli, *NASA Langley Research Center* (**23**, 5, p. 812) Article

G00-121 Structural Identification Using Inverse System Dynamics. Daniel C. Kammer and Adam D. Steltzner, *University of Wisconsin-Madison* (**23**, 5, p. 819) Article

G00-122 Shared Information Between Pilots and Controllers in Tactical Air Traffic Control. Todd C. Farley, R. John Hansman, Keith Amonlirdviman, *Massachusetts Institute of Technology*; and Mica R. Endsley, *SA Technologies* (**23**, 5, p. 826) Article

G00-123 Adaptive Autopilot Design for Guided Munitions. Anthony J. Calise and Manu Sharma, *Georgia Institute of Technology*; and J. Eric Corban, *Guided Systems Technologies, Inc.* (**23**, 5, p. 837) Article

G00-124 State-Space Approach to $\int_1$-Optimal Robust Tracking. Craig N. Scott and Lincoln A. Wood, *Royal Melbourne Institute of Technology* (**23**, 5, p. 844) Article

G00-125 Extension of $\int_1$-Optimal Robust Tracking to the Multivariable Case. Craig N. Scott and Lincoln A. Wood, *Royal Melbourne Institute of Technology* (**23**, 5, p. 850) Article

G00-126 Robust H_∞ Estimation and Fault Detection of Uncertain Dynamic Systems. Emmanuel G. Collins, Jr., *Florida A&M University-Florida State University* and Tinglun Song, *Altair Engineering, Inc.* (**23**, 5, p. 857) Article

G00-127 Direct Method for Rapid Prototyping of Near-Optimal Aircraft Trajectories. Oleg A. Yakimenko, *Aviation and Aeronautics Academy of Sciences* (**23**, 5, p. 865) Article

G00-128 Intelligent Adaptive Control of a Tailless Advanced Fighter Aircraft Under Wing Damage. Jovan D. Boskovic and Raman K. Mehra, *Scientific Systems Company, Inc.* (**23**, 5, p. 876) Article

G00-129 Second Estimator of the Optimal Quaternion. Daniele Mortari, *University of Rome* (**23**, 5, p. 885) Engineering Note

G00-130 Improving Time-Optimal Maneuvers of Two-Link Robotic Manipulators. Walerian Szyszkowski and Reza Fotouhi-C, *University of Saskatchewan* (**23**, 5, p. 888) Engineering Note

G00-131 Three-Dimensional Guidance Law for Landing on a Celestial Object. Der-Cherng Liaw and Yew-Wen Liang, *National Chiao Tung University* (**23**, 5, p. 890) Engineering Note

G00-132 Setpoint Generation for Constant-Velocity Motion of Space-Based Scanners. Rebecca A. Masterson, *Massachusetts Institute of Technology*; William E. Singhose, *Georgia Institute of Technology*; and Warren P. Seering, *Massachusetts Institute of Technology* (**23**, 5, p. 892) Engineering Note

G00-133 Worst-Case Distributions for Performance Evaluation of Proportionally Guided Missiles. Keren Rinat and Joseph Z. Ben-Asher, *Technion-Israel Institute of Technology* (**23**, 5, p. 895) Engineering Note

G00-134 Equations For Approximate Solutions Using Variational Calculus. David G. Hull, *University of Texas at Austin* (**23**, 5, p. 898) Engineering Note

G00-135 Improved Dispersion of a Fin-Stabilized Projectile Using a Passive Moveable Nose. Mark Costello and Raditya Agarwalla, *Oregon State University* (**23**, 5, p. 900) Engineering Note

G00-136 Multi-Input, Multi-Output, Band-Limited Transducer Selection for Disturbance Rejection. Robert L. Clark, *Duke University*; and David E. Cox, *NASA Langley Research Center* (**23**, 5, p. 903) Engineering Note

G00-137 Passive Nutation Control of Spinning Spacecraft Through the Use of Multiple Booms. F. O. Eke, *University of California*; A. Harvey, *Toyo Tanso USA, Inc.*; and E. M. Eke, *California State University* (**23**, 5, p. 906) Engineering Note

G00-138 Frequency-Domain Recursive Robust Indentification. Xu Feng and Ching-Fang Lin, *American GNC Corporation*; and Norman P. Coleman, *Army Armament Research, Development and Engineering Center* (**23**, 5, p. 908) Engineering Note

G00-139 Benchmark Active Controls Technology Model Aerodynamic Data. Robert C. Scott, Sherwood T. Hoadley, Carol D. Wieseman, and Michael H. Durham, *NASA Langley Research Center* (**23**, 5, p. 914) Article based on AIAA Paper 97-0829

G00-140 Computational Test Cases for the Benchmark Active Controls Model. Robert M. Bennett, Robert C. Scott, and Carol D. Wieseman, *NASA Langley Research Center* (**23**, 5, p. 922) Article

G00-141 Transonic Flutter Suppression Control Law Design and Wind-Tunnel Test Results. Vivek Mukhopadhyay, *NASA Langley Research Center* (**23**, 5, p. 930) Article based on AIAA Paper 99-1396

G00-142 Passivity-Based Robust Control with Application to Benchmark Active Controls Technology Wing. A. G. Kelkar, *Kansas State University*; and S. M. Joshi, *NASA Langley Research Center* (**23**, 5, p. 938) Article

G00-143 Comparing Linear Parameter-Varying Gain-Scheduled Control Techniques for Active Flutter Suppression. Jeffrey M. Barker and Gary J. Balas, *University of Minnesota* (**23**, 5, p. 948) Article

G00-144 Experiments on Control of Limit-Cycle Oscillations in a Typical Section. Kenneth D. Frampton and Robert L. Clark, *Duke University* (**23**, 5, p. 956) Article based on AIAA Paper 99-1466

G00-145 Identification and Retuning of Optimum Delayed Feedback Vibration Absorber. Nader Jalili, *Northern Illinois University*; and Nejat Olgac, *University of Connecticut* (**23**, 6, p. 961) Article

G00-146 Safety Constrained Free-Flyer Path Planning at the International Space Station. Alexander B. Roger and Colin R. McInnes, *University of Glasgow* (**23**, 6, p. 971) Article

G00-147 Online Estimation of Allan Variance Parameters. Jason J. Ford and Michael E. Evans, *Defence Science Technology Organisation* (**23**, 6, p. 980) Article

G00-148 Gain-Scheduled Control: Relaxing Slow Variation Requirements by Velocity-Based Design. Douglas J. Leith and William E. Leithead, *University of Strathclyde* (**23**, 6, p. 988) Article

G00-149 Robust H_∞ Deconvolution and Its Application to Fault Detection. I. Yaesh, *Israel Military Industries, Ltd.*; and U. Shaked, *Tel Aviv University* (**23**, 6, p. 1001) Article

G00-150 Reusable Launch Vehicle Control in Multiple-Time-Scale Sliding Modes. Yuri Shtessel, *University of Alabama in Huntsville*; and Charles Hall and Mark Jackson, *NASA Marshall Space Flight Center* (**23**, 6, p. 1013) Article

G00-151 Novel Method for Identification of Aircraft Trajectories in Three-Dimensional Space. Artur Korgul, *Military University of Technology* (**23**, 6, p. 1021) Article

G00-152 Active Flutter Suppression Using Recurrent Neural Networks. Franco Bernelli-Zazzera, Paolo Mantegazza, Giovanni Mazzoni, and Matteo Rendina, *Politecnico di Milano* (**23**, 6, p. 1030) Article

G00-153 Decentralized Design for Integrated Flight/Propulsion Control of Aircraft. Zhenyang Chen and Petros G. Voulgaris, *University of Illinois at Urbana-Champaign* (**23**, 6, p. 1037) Article

G00-154 Quantitative Cross-Feed and Feedback Design of Helicopter in near Hover Flight. Ukpai I. Ukpai and O. D. I. Nwokah, *Southern Methodist University*; and Edward Boje, *University of Natal* (**23**, 6, p. 1045) Article

G00-155 Tensegrity Flight Simulator. Cornel Sultan and Martin Corless, *Purdue University*; and Robert E. Skelton, *University of California* (**23**, 6, p. 1055) Article

G00-156 Analytic Steady-State Accuracy of a Spacecraft Attitude Estimator. F. Landis Markley, *NASA Goddard Space Flight Center*; and R. G. Reynolds, *SpectrumAstro, Inc.* (**23**, 6, p. 1065) Engineering Note

G00-157 Robust H_2 Estimation with Application to Robust Fault Detection. Tinglun Song and Emmanuel G. Collins, Jr., *Florida A&M University and Florida State University* (**23**, 6, p. 1067) Engineering Note

G00-158 Closed-Form Solution of Seventh-Order Navigation System for Unaided Flyout. Jerome J. Krempasky, *Raytheon Electronic Systems* (**23**, 6, p. 1072) Engineering Note

G00-159 Payload Mass Fractions for Minimum-Time Trajectories of Flat and Compound Solar Sails. Colin R. McInnes, *University of Glasgow* (**23**, 6, p. 1076) Engineering Note

G00-160 Collision Dynamics for Space Tethers. Chris Blanksby and Pavel Trivailo, *Royal Melbourne Institute of Technology* (**23**, 6, p. 1078) Engineering Note

G00-161 Two Projectiles Connected by a Flexible Tether Dropped in the Atmosphere. Geoffrey Frost and Mark Costello, *Oregon State University* (**23**, 6, p. 1081) Engineering Note

G00-162 New Method for Extracting the Quaternion from a Rotation Matrix. Itzhack Y. Bar-Itzhack, *Technion—Israel Institute of Technology* (**23**, 6, p. 1085) Engineering Note

G00-163 Comparison of Two Navier-Stokes Methods with Benchmark Active Control Technology Experiments. Robert E. Bartels and David M. Schuster, *NASA Langley Research Center* (**23**, 6, p. 1134) Article

G00-164 Active Control of Wind-Tunnel Model Aeroelastic Response Using Neural Networks. Robert C. Scott, *NASA Langley Research Center*; and Lawrence E. Pado, *The Boeing Company* (**23**, 6, p. 1109) Article

G00-165 Adaptive Output Feedback Control of a Nonlinear Aeroelastic Structure. WenHong Xing and Sahjendra N. Singh, *University of Nevada* (**23**, 6, p. 1094) Article

G00-166 Fundamental Aeroservoelastic Study Combining Unsteady Computational Fluid Mechanics with Adaptive Control. Damien M. Guillot and Peretz P. Friedmann, *University of California*(**23**, 6, p. 1124) Article

G00-167 Identification and Control of Limit Cycle Oscillations in Aeroelastic Systems. Thomas W. Strganac, Jeonghwan Ko, David E. Thompson, *Texas A&M University*; and Andrew J. Kurdila, *University of Florida* (**23**, 6, p. 1102) Article

G00-168 Control of a Nonlinear Aeroelastic System Using Euler-Lagrange Theory. Ravi K. Prasanth and Raman K. Mehra, *Scientific Systems Company*, (**23**, 6, p. 1118) Article based on AIAA Paper 99-4089
